SVITANTE SV44

# Safety data sheet

# SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Code: C00257-04264
Product name SVITANTE SV44

# 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use Loosener/unlocking in "Aerosol" solvent-based.

1.3. Details of the supplier of the safety data sheet

Name PIGAL s.p.a. Full address Via G. Rossa, 2

District and Country 40053 VALSAMOGGIA - Crespellano (BO)

ITALIA

Tel. +39 051969068 Fax +39 051969353

e-mail address of the competent person

responsible for the Safety Data Sheet health.safety@pigal.it; pigalab@pigal.it

1.4. Emergency telephone number

For urgent inquiries refer to +39 051969068 ore ufficio/office hours (8.30-13; 14-17.30) 118 (contattare il centro

antiveleni più vicino)/please contact your near local poison control center

# **SECTION 2. Hazards identification.**

#### 2.1. Classification of the substance or mixture.

The product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of EC Regulation 1907/2006 and subsequent amendments. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

# 2.1.1. Regulation 1272/2008 (CLP) and following amendments and adjustments.

Hazard classification and indication:

 Aerosol 1
 H222

 H229
 H229

 Skin Irrit. 2
 H315

 STOT SE 3
 H336

 Aquatic Chronic 2
 H411

#### 2.1.2. 67/548/EEC and 1999/45/EC Directives and following amendments and adjustments.

Danger Symbols: F+-Xi-N R phrases: 12-38-51/53-67

The full wording of the Risk (R) and hazard (H) phrases is given in section 16 of the sheet.

Revision nr. 2

Dated 12/3/2015

Printed on 23/09/2015

Page n. 2/14

# **SVITANTE SV44**

#### 2.2. Label elements.

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words:

Danger

#### Hazard statements:

**H222** Extremely flammable aerosol.

**H229** Pressurized container: may burst if heated.

**H315** Causes skin irritation.

**H336** May cause drowsiness or dizziness.

**H411** Toxic to aquatic life with long lasting effects.

#### Precautionary statements:

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P210 Keep away from heat / sparks / open flames / hot surfaces. No smoking.

P211 Do not spray on an open flame or other ignition source.
P251 Pressurized container: do not pierce or burn, even after use.

**P280** Wear protective gloves, eye protection.

P302+P352 IF ON SKIN: Wash with plenty of soap and water.

P410+P412 Protect from sunlight. Do no expose to temperatures exceeding 50°C / 122°F.

**Contains:** C7 hydrocarbons - n-alkanes, isoalkanes, cyclic

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics.

#### 2.3. Other hazards.

Information not available.

# **SECTION 3. Composition/information on ingredients.**

#### 3.1. Substances.

Information not relevant.

#### 3.2. Mixtures.

Contains:

# **SECTION 4. First aid measures.**

#### 4.1. Description of first aid measures.

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

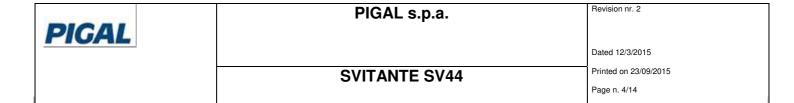

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

#### 4.2. Most important symptoms and effects, both acute and delayed.

For symptoms and effects caused by the contained substances, see chap. 11.

#### 4.3. Indication of any immediate medical attention and special treatment needed.

Information not available.

# **SECTION 5. Firefighting measures.**

#### 5.1. Extinguishing media.

#### SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

#### 5.2. Special hazards arising from the substance or mixture.

#### HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

#### 5.3. Advice for firefighters.

#### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

# SECTION 6. Accidental release measures.

#### 6.1. Personal precautions, protective equipment and emergency procedures.

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear protective gloves / protective clothing / eye protection / face protection.

### 6.2. Environmental precautions.

Do not disperse in the environment.

### 6.3. Methods and material for containment and cleaning up.

Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

# 6.4. Reference to other sections.

Any information on personal protection and disposal is given in sections 8 and 13.

# SECTION 7. Handling and storage.

# 7.1. Precautions for safe handling.

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

Revision nr. 2

Dated 12/3/2015

Printed on 23/09/2015

Page n. 5/14

# **SVITANTE SV44**

#### 7.2. Conditions for safe storage, including any incompatibilities.

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C, away from any combustion sources.

#### 7.3. Specific end use(s).

Both for consumer and professional user:

Keep away from heat, sparks, flames

Do not use on hot surfaces or exposed to sunlight

Do not breathe spray / vapors

Avoid contact with eyes, skin, clothing

Do not eat, drink or smoke during use

Do not use in confined spaces and / or limited

Avoid overuse of the product to avoid creating accumulations of flammable gas in the air

Use at a distance of 20 cm from the surface to be treated to prevent leakage in the air

Spray for short intervals, and make sure the presence of good ventilation after use.

# **SECTION 8. Exposure controls/personal protection.**

#### 8.1. Control parameters.

#### 8.2. Exposure controls.

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

#### HAND PROTECTION

None required.

# SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

#### EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, a mask with a type AX filter combined with a type P filter should be worn (see standard EN 14387).

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

# SECTION 10. Stability and reactivity.

#### 10.1. Reactivity.

There are no particular risks of reaction with other substances in normal conditions of use.

Hydrocarbons, C7, n-alkanes, isoalkanes, cyclical - Reacts violently with strong oxidants. Attacks many plastics.

1,2-DICHLOROPROPANE: decomposes on contact with flames or red hot surfaces. Attacks aluminum alloys and some types of plastics.

#### 10.2. Chemical stability.

The product is stable in normal conditions of use and storage.

#### 10.3. Possibility of hazardous reactions.

No hazardous reactions are foreseeable in normal conditions of use and storage.

1,2-DICHLOROPROPANE: risk of explosion on contact with: aluminium and metal powders. It may react dangerously with: alkaline metals, alkaline earth metals, sodium amides. Forms explosive mixtures with the air.

# 10.4. Conditions to avoid.

Avoid overheating.

# 10.5. Incompatible materials.

Strong reducing or oxidising agents, strong acids or alkalis, hot material.

# 10.6. Hazardous decomposition products.

1,2-DICHLOROPROPANE: hydrochloric acid.

#### 11.1. Information on toxicological effects.

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

Acute effects: contact with skin may cause: irritation, erythema, edema, dryness and chapped skin. Vapour inhalation may slightly irritate the upper respiratory trait. Ingestion may cause health disorders, including stomach pain and sting, nausea and sickness.

This product contains highly volatile substances, which may cause serious depression of the central nervous system (CNS) and have negative effects, such as drowsiness, dizziness, slow reflexes, narcosis.

PETROLEUM GAS - The substance can be absorbed into the body by a loss inalazione. Causa liquid evaporates very quickly displacing the air and causing a serious risk of suffocation when in chiusi. Una Rapid evaporation of the liquid may cause frostbite.

The substance may cause effects on the central nervous system.

ACUTE HAZARDS / SYMPTOMS

INHALATION Drowsiness. Unconsciousness.

SKIN ON CONTACT WITH LIQUID: FREEZING.

EYE CONTACT WITH LIQUID: FREEZING.

C7 hydrocarbons - n- alkanes, isoalkanes, cyclic

The substance can be absorbed into the body by inhalation of its vapor and by ingestion .

INHALATION RISK: A harmful contamination of the air will be reached rather slowly evaporation of this substance at 20 ° C.

EFFECTS OF SHORT- TERM EXPOSURE: The substance is irritating to the eyes and skin. The vapor is irritating

for the eyes, the skin and the respiratory tract. If this liquid is swallowed, aspiration into the lungs can lead to pneumonia chemistry. The substance may cause effects on the central nervous system.

EFFECTS OF LONG-TERM OR REPEATED EXPOSURE: The liquid defats the skin. The substance may have effects on the liver, resulting in impaired functions.

ACUTE HAZARDS / SYMPTOMS

INHALATION Torpor . Headache .

SKIN Dry skin.

EYES Redness . Pain .

Ingestion Abdominal cramps . Burning sensation. Nausea . Vomiting.

NOTES The odor is not a sufficient warning of exceeding the exposure limit.

1,2-dichloropropane: the substance can be absorbed into the body by inhalation and ingestion. A harmful contamination of the air can be reached rather quickly on evaporation of this substance at 20 ° C.

SHORT-TERM EXPOSURE: the substance is irritating to the eyes, the skin and the respiratory tract.

The substance may cause effects on the central nervous system.

LONG-TERM OR REPEATED EXPOSURE: The liquid defats the skin. the substance may have effects on the liver and kidneys.

ACUTE HAZARDS / SYMPTOMS

INHALATION - Cough. Dizziness. Drowsiness. Headache. Sore throat.

SKIN - Dry skin. Redness. Pain.

EYES - Redness. Pain.

INGESTION - Abdominal pain. Diarrhea. Drowsiness. Headache. Nausea. Vomiting.

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics. - The substance can be absorbed into the body by inhalation of its vapor and by ingestion. INHALATION RISK: there can be no indication of the speed with which it reaches aN harmful contamination of the air by evaporation of this substance at 20 ° C.

EFFECTS OF SHORT-TERM EXPOSURE: the vapor is slightly irritating to the eyes The substance may have effects on the central nervous system exposure to high concentration of vapors can lead to a state of unconsciousness. If this liquid is swallowed, aspiration into the lungs may result in chemical pneumonitis.

EFFECTS OF LONG-TERM OR REPEATED EXPOSURE: The liquid defats the skin.

ACUTE HAZARDS / SYMPTOMS - INHALATION Dizziness. Headache . Drowsiness. Nausea . Unconsciousness.

SKIN Dry skin .

EYES Redness .

Ingestion Cough. Diarrhea. Sore throat. Vomiting. (Further see Inhalation).

C7 hydrocarbons - n-alkanes, isoalkanes, cyclic LD50 (Oral). 8 mg/kg Rat LD50 (Dermal). 4 mg/kg Rat LC50 (Inhalation). 23,3 mg/l/4h Rat

Revision nr. 2

Dated 12/3/2015

Page n. 9/14

Printed on 23/09/2015

# **SVITANTE SV44**

1,2-DICHLOROPROPANE LD50 (Oral). 1900 mg/kg ratto LD50 (Dermal). 8750 mg/kg ratto

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics.

LD50 (Oral). > 5000 mg/kg Rat LD50 (Dermal). > 2000 mg/kg Rat LC50 (Inhalation). > 5000 mg/l Rat

With regard to the mix:

ATE(mix) oral = 29.970,1 mg/kg ATE(mix) dermal = 0,0 mg/kg ATE(mix) inhal = 23,7 mg/l/4 h

The product, if brought into contact with the skin it causes significant inflammation with erythema, scabs, and edema.

Specific target organ toxicity (STOT) single exposure: attention, the vapors may cause drowsiness and dizziness.

# **SECTION 12. Ecological information.**

This product is dangerous for the environment and is toxic for aquatic organisms. In the long term, it have negative effects on acquatic environment. **12.1. Toxicity.** 

1,2-dichloropropane Toxicity to daphnia and other aquatic invertebrates

EC50 / 24h = 11.5 mg / I Daphnia magna.

Liquefied petroleum gas EC50 - for Crustacea.

14,22 mg/l/48h daphnia magna

C7 hydrocarbons - n-alkanes, isoalkanes, cyclic

LC50 - for Fish.

> 134 mg/l/96h Oncorhynchus mykiss (trota arcobaleno)

EC50 - for Crustacea.

12 mg/l/48h Daphnia magna

EC50 - for Algae / Aquatic Plants.

> 10 mg/l/72h Pseudokirchnerella subcapitata

# 1,2-DICHLOROPROPANE

LC50 - for Fish.

127 mg/l/96h Pimephales promelas

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics.

LC50 - for Fish.

> 1000 mg/l/96h Oncorhynchus mykiss

EC50 - for Crustacea.

1000 mg/l/48h Daphnia magna

#### 12.2. Persistence and degradability.

The paraffinic hydrocarbons fraction may be considered biodegradable in water and in air. They distribute mostly in the air. The small non biodegradable amount which spreads into water tends to accumulate in fish.

#### 12.3. Bioaccumulative potential.

Liquefied petroleum gas

Partition coefficient: n-octanol/water.

< 2.8 mg/l

12.4. Mobility in soil.

Information not available.

#### 12.5. Results of PBT and vPvB assessment.

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

12.6. Other adverse effects.

Information not available.

# **SECTION 13. Disposal considerations.**

The valid EEC waste code are largely source-related; the manifacturer is, therefore, unable to specify waste code for products used in various sectors. CER-code (suggested): 16 05 04.

#### 13.1. Waste treatment methods.

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Avoid littering. Do not contaminate soil, sewers and waterways.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

# **SECTION 14. Transport information.**

These goods must be transported by vehicles authorized to the carriage of dangerous goods according to the provisions set out in the current edition of the Code of International Carriage of Dangerous Goods by Road (ADR) and in all the applicable national regulations. These goods must be packed in their original packagings or in packagings made of materials resistant to their content and not reacting dangerously with it. People loading and unloading dangerous goods must be trained on all the risks deriving from these substances and on all actions that must be taken in case of emergency situations.
